An enterprising Computer Science graduate with passion for programming. Proficient in developing responsive and user-friendly web applications using Next.js and React.js. A quick and keen learner of new technologies with utmost dedication to deliver outstanding results.

Education

B.Sc Computer Science (St. Joseph's college, Trichy) - 2016- 2019.

Work experience and project details

Canny Digital Solution Pvt Ltd, Sipcot, Chennai - Frontend developer - From Oct 2023 onwards

- Worked on Progressive Web Application development(PWA), Components development, UI implementation, API integration, Adopting best practices.

Self-Driven App Development and React JS Training - From April 2023 till Sep 2023

- Enhanced my knowledge by self-developing Apps
- I have completed 3 months of React JS training
- Pursuing advanced REACT in Coursera

Tata Consultancy Services, Chennai - Process Associate (Telstra) - From Dec 2019 to Apr 2023

- Processing and timely closure of customer billing dispute cases.
- Resolution of customer disputes related to incorrect pricing, billing, and system issues.

Accomplishments

- 7 times Recipient of customer **appreciation and recognition** during my tenure in TCS for excellence in work.

Projects:

Wedding and Beyonds (WnB) App (Canny Digital Solution Pvt Ltd)

Duration: 5 Months

- Wedding and Beyond (WnB) User App for wedding-related purchases and related requirements.
- The app's scope includes an exclusive coupon feature, allowing users to enjoy flat discounts on jewelry, furniture, and cars from renowned brands affiliated with the WnB app.
- The WnB has 3 apps (User, Admin, Brand).

Technical design of the App

- Next.js within the Atomic Structure and Mono repository architecture.
- Skeleton loading is used on all the pages for lag free user experience.
- Develop UI component development with the figma and swagger for API integration
- Bitbucket is used to merge the code in development

My role and responsibilities

- Component Development, UI Implementation, Mobile Responsiveness, Integration with APIs
- Building the UI by creating functional components.
- Integrating API for various events on the application.
- The completed tasks are raised with the pull request and the codes are deployed in repository
- Fixing UI related bugs

Project URL: <https://www.weddingnbeyond.com/>

Agile methodologies followed

- Jira, Bitbucket
- Daily Scrum meetings. Updating assigned task status in Jira

Programming Skills

- HTML5
- CSS3
- Javascript
- ReactJS (functional component, hooks and props)
- Next JS
- Code Architecture : Mono repository, Atomic Structure.
- GitHub: <https://github.com/Josephkennedy603>

My other Self-developed APPS

I have hands-on experience on coding and the development process . The below Apps were developed on my own.

Dictionary App

- Developed with **ReactJS**.
- Used **Axios** for fetching the data.

Authentication App

- Developed with **ReactJS**.
- Firebase is utilized for checking user data.

To-Do List App

- Implemented Create, Read, Update and Delete functionalities using an **Array**.
- **Firebase** has been used for storing the data.

Profile Website

- Developed with **HTML** and **CSS**.
- <https://kennedy-portfolio.tiiny.site/>

Certification and training

- Successfully completed 3 months of **ReactJS** training.- Apr 2023 to July 2023
