| Dec 2019 - Apr 2023

Tata Consultancy Services, *Chennai*

- Processing and timely closure of customer billing dispute cases.
- Resolution of customer disputes related to incorrect pricing, billing, and system issues.

Accomplishments

- Seven time recipient of customer appreciation and recognition.

PROJECTS

Wedding and Beyonds (WnB) App

Wedding and Beyond (WnB) User App is a one-stop platform for wedding-related services and purchases. The app offers rental services for wedding cars, furniture and jewellery.

- Building mobile responsive UI by creating functional components in ReactJS.
- Integrating API for various events on the application and Fixing UI related bugs.
- The completed tasks are raised with the pull request and the codes are deployed in the repository.

| Tech Stack: **ReactJS**

| Agile Methods: **Jira, Bitbucket, daily scrum meetings and updating assigned task status in Jira**

EDUCATION

B.Sc Computer Science

St. Joseph's college, *Trichy*
CGPA 7.0 / 10

TOP SKILLS

- **ReactJS**
- **NodeJS**
- **ExpressJS**
- **MongoDB**

SKILLS

Languages

- Javascript (ES6+)

Frameworks & Libraries

- ReactJS
- NodeJS
- ExpressJS
- Redux (Redux toolkit)
- Mongoose

Databases

- MongoDB

Markup Languages

- HTML5
- CSS3

Code Architecture

- Mono repository
- Atomic structure

Ecommerce App (Self-developed)

A feature-rich E-commerce platform enabling seamless user authentication, secure online payments via Razorpay, and dynamic cart management.

- Developed using ReactJS with Redux Toolkit for efficient state management in frontend.
- Implemented backend services using Node.js and MongoDB.
- Integrated Razorpay for secure online payments and implemented automated email generation for order confirmations and transactional updates, ensuring a seamless and reliable user experience.

| *Tech Stack: **ReactJS, NodeJS, MongoDB and Razorpay***

MY OTHER SELF-DEVELOPED APPS

Acquired hands-on experience on fullstack development.

CRUD App

- Designed and developed a CRUD application to perform Create, Read, Update, and Delete operations.
- Utilized the MERN stack (MongoDB, Express.js, React.js, Node.js) for seamless integration between the frontend and backend.

| *Tech Stack: **ReactJS, NodeJS and MongoDB***

Dictionary App

- Developed with ReactJS.
- Used Axios for fetching the data.

| *Tech Stack: **ReactJS.***

CERTIFICATION AND TRAINING

MERN Stack Training

SLA Institute

July 2024 to December 2024

JavaScript Certification

Coursera

Feb 2024 to May 2024

ReactJS Training

Newme Technologies

Apr 2023 to July 2023
